

A FLEx Experience for the Staff

Led by the high school principal Grace Voo, the staff of Vancouver Christian School kicked off their year by participating in a project during their staff retreat. The staff were split into two teams with the task of creating furniture for their roof top learning space. By participating in a 'real work, real needs, real people' experience as learners themselves, the staff is empowered to design these formative experiences for their students this year. In the meantime, they have created furniture for a beautiful outdoor learning space for their students and themselves.
